

Middleton Technology School Maths Department

We are looking to appoint a lively and enthusiastic teacher to join an outstanding and supportive department committed to raising levels of achievement.

Our results are amongst the best in the school and we achieve well above the National average. Last year 77% of students achieved grades 9-4.

At Key Stage 3 students follow a maths mastery curriculum, which encourages deeper conceptual understanding over time. At Key Stage 4 all students follow the Edexcel GCSE linear specification in Mathematics.

We believe that our continued success depends upon team work and shared responsibilities. We are extremely supportive and are keen to share and develop new ideas.

The Maths department is based in the main school, and each classroom has its own computer, multimedia projector and interactive whiteboard. The Maths department has a class set of laptops, and Nintendo DS' for student use and in addition to this we have access to a number of computer suites. The Maths department has full access to many maths ICT packages.
