Comments on Rates and Trends

There has been a further increase in the number of children looked after by Bolton Council. The number of LAC has now increased by just over 7% from the low point in May 2016. The trend towards receiving larger numbers of very young children into care continues.

17	7	9	2	5
18+	0	23	1	21
Total	167	177	157	141

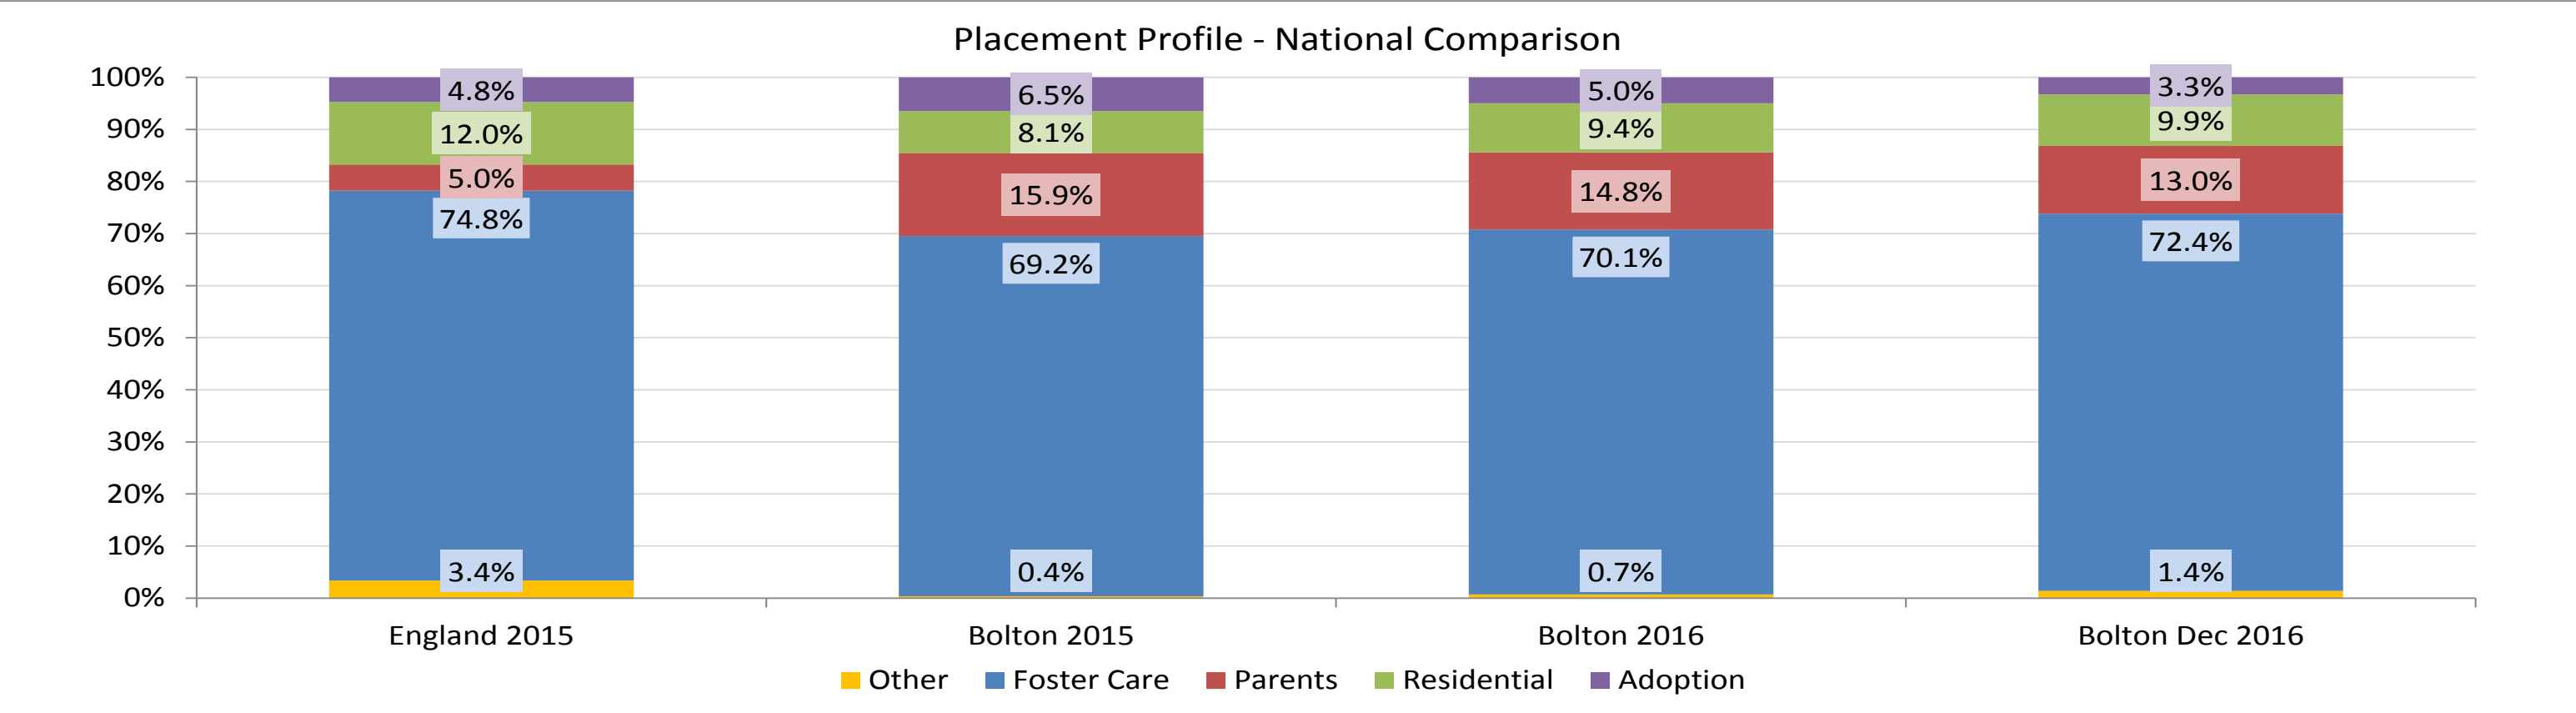

Comments on Admissions and Discharges

Although the number of discharges this month was slightly increased on last month, this was more than compensated for in a very large increase in the number of admissions to care. Number of adoptions was down this quarter.

Social Care Management Information Report (Looked After Children)

3.3 Placements

Comments on Placements

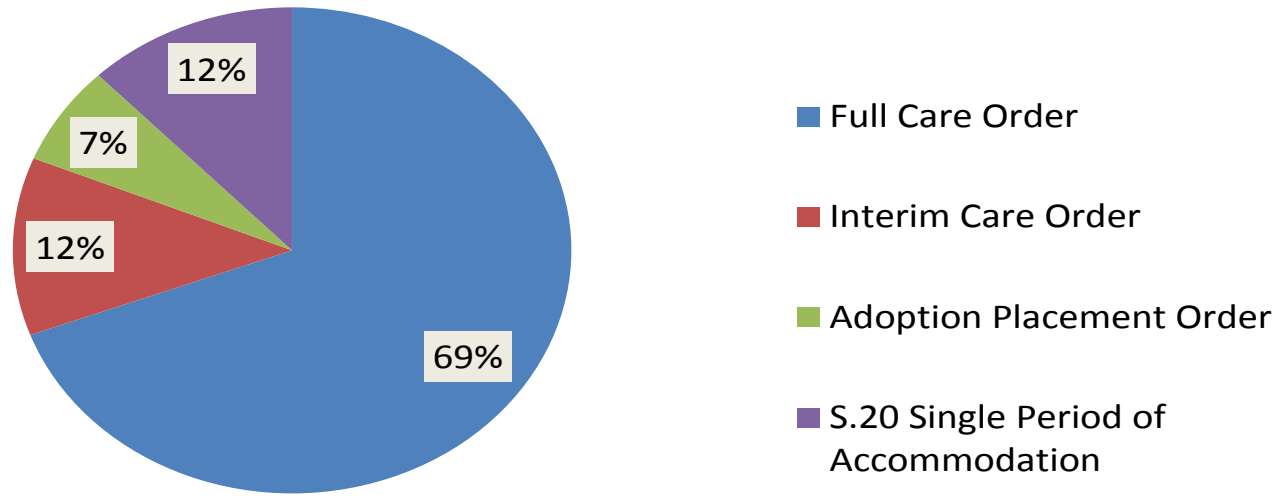

Bolton continues to maintain it's low rates of Out of Borough placements. The fall in the proportion of children placed with parents continues though Bolton's rates remain above the most recent data we have for comparator authorities. The increase in the number of children placed with in house foster carers has been sustained. The slow increase in the number of children in kinship care placements appears to have ended. Numbers of adoptive placements have fallen slightly - adoptive placements remain at a comparatively low level, though Bolton still places more children for adoption than its peers.

A Note on IRO Reviews

The number of IRO Reviews in the latest month will be significantly lower than the previous figures. This is because it takes some time for the information to be fully logged on the system and is usually completed outside the timeframe of this report. The figures for the most recent month will be updated for the next report.

Comments on LAC Reviews

Basing comment on November data, as per the above note, IRO reviews are significantly higher than at the same time last year.

Comments on Miscellaneous

It is important to recognise that the data reported for PEPs relates only to PEPs recorded on Liquid Logic using our refreshed PEP processes and does not include a measure of how frequently PEPs have been updated - this is subject to separate discussions.

Data relating to the wellbeing of care leavers is calculated using locally meaningful definitions which do not correspond exactly to definitions in DfE Stat Releases. Data published by DfE suggests that Bolton has a higher proportion of care leavers NEET than our comparators, but that this may be attributable to our success in keeping in touch with our care leavers, as we also have higher rates of care leavers in EET and a low rate of "not knowns". The national data suggests that Bolton is particularly effective at supporting care leavers into HE. Comparator data published by DfE further suggests that Bolton now has a slightly higher proportion of care leavers living in suitable accommodation than is the case nationally.

Data on staff vacancy rates was calculated using local definitions which do not correspond exactly with definitions in the Social Care Workforce Return submitted to DfE.
